Leadership & Awards

立命館大学衣笠 SKP
Video Game Dev Club VP
BSA Eagle Scout
Tri-M Music Honor Society
UMN Dean's List

Languages + Skills

Natively fluent:
- C, C++, C#, Java, Python,
- HTML, JS. CSS, Bootstrap
- Unity, Unreal, Git/Perforce

(Plus, I make good coffee!)

Conversationally fluent:
- PostgreSQL, SQL, Lua
- Rust, Kotlin, Swift, LaTeX
- Japanese

Tourist:
- React.js, Next.js, Typescript
- Ruby, x86, Go, Scala, R

Activities

Intramural Volleyball
Jazz Band Drummer
Game Jams
Fighting Game Club

Ask Me About

Studying abroad in *Kyoto*
Some of my favorite *Movies*
Almost anything *Musical*
My love for *Games/Technology*

Education

Masters in Computer Science

University of Minnesota, Fall 2025 - Spring 2027

Notable Classes: Intro to Quantum Computing, Artificial Intelligence I, Intelligent Visual Information Systems, XR Tools and 3D Drawing.

Software Engineering and Creative Design, BIS

University of Minnesota Undergrad, Spring 2023, Minor in Japanese Studies

Work Experience

Teacher Assistant

University of Minnesota | 2025 - 2026

- Provided technical guidance to faculty by using my industry experience in game development and leadership in the space to improve teaching materials.
- Gave lectures on modern tools, while providing insight into design practices, graphics programming, and more for a class of approximately 90+ students.
- Reviewed and improved students' projects by offering concise, actionable feedback on project implementation, real-time rendering, and interaction design.

Software Engineer (Gameplay)

Avalon Corp. | June – Dec. 2024

- Architected a scalable, modular framework for character abilities and interaction logic, enabling rapid iteration with simple tools and long-term maintainability.
- Refactored the animation pipeline, implementing data-oriented design principles to enhance performance, scalability, and support large-scale multiplayer sessions.
- Engineered core gameplay subsystems, including input buffering, animation canceling, and the combo system and data structures for dynamic user inputs.

AI Intern

Hangar 13 | Summer 2021

- Optimized performance in an open-world multiplayer game by profiling usage of CPU /GPU, debugging logic systems, and reducing computational overhead.
- Diagnosed pitfalls with the reasoning systems, resolving complex pathfinding, dynamic threat assessment, 3D spatial awareness, and behavior tree issues.

Projects

Dynamically Adjustable Motion Captured Data Renderer

VR & 3D Interaction Projects	Water Fluid/Pressure Simulations
Physics & Cloth Simulations	Bus Scheduling Simulator

A more comprehensive list of all projects is located on my website.

React Bot

Personal Projects | Python, PostgreSQL

- Designed and built a feature-rich Discord bot that uses real-time message parsing to send unique responses to users in both guilds and direct messages.
- Released and actively maintained post-release, ensuring 99% uptime, monitoring performance, and rolling out updates for 500+ active Discord servers she's in.
